INTERVIEWIQ ML SAMPLE RESUME - FICTIONAL TEST DATA

Alex Morgan | alex.morgan@example.test | Sample City

SUMMARY

Computer science student with experience building local web APIs and data tools.

TECHNICAL SKILLS

Java, Python, JavaScript, React, Node.js, Express, FastAPI, MongoDB, MySQL, Redis, Git, Docker, REST APIs, scikit-learn

EDUCATION

BSc Computer Science, Northbridge University (fictional), 2022-2026
Relevant study: Data Structures, Algorithms, Databases, Machine Learning

PROJECTS

Interview Prep API: Built a FastAPI and React practice app with resume parsing, REST endpoints, and local TF-IDF matching. Added input validation and tests.
Study Group Planner: Developed a Node.js and Express service with MongoDB, Redis caching, and Docker for repeatable local development.
Course Outcome Explorer: Used Python and scikit-learn to compare course feedback themes. Cleaned data, evaluated features, and documented limitations.

EXPERIENCE

Student Developer (fictional), Campus Computing Lab, 2024-2025
Implemented API fixes, reviewed Git changes, and helped debug student projects. Worked with a small team and documented setup steps for incoming contributors.

CERTIFICATIONS

Sample entry: Introductory Cloud Computing (fictional)
